Obstetric Phantom With Fetal Doll

AR50S

AR50S-B

The Obstetric Phantom with Fetal Doll offers an affordable and highly effective way to develop essential obstetric skills. Designed with an internal female pelvis, flexible vulva, removable abdominal wall and adjustable fetal positions, this realistic model allows students to confidently practice fetal palpation, assessment, positioning, and delivery techniques in a safe, simulated environment.

Perfect for T-Level teaching and other healthcare training programmes, this model offers exceptional educational value by combining practical realism with cost efficiency. Institutions can provide comprehensive, hands-on training without the substantial investment typically required for comparable models, making it an ideal choice for enhancing both student confidence and curriculum delivery.

Skills

- The fetal doll can be placed in the model in various positions, to enable the student to practise palpation through the abdominal wall
- Different birth positions can be demonstrated

Features

- Based on a female pelvis, this life size model features all the relevant landmarks
- The vulva will stretch during the delivery procedure and afterwards will return to its original form
- Removable abdominal wall
- Available in light and dark skin tones
