Obstetric Phantom Set

AR57

AR57-B

The Obstetric Phantom Set offers comprehensive, hands-on training in fetal palpation and delivery techniques. Designed with an internal female pelvis, removable abdominal wall, fetal doll with interchangeable heads and female pelvis with flexible coccyx. It enables students to explore a wide range of birth positions, assessment methods, and delivery scenarios.

Perfect for T-Level teaching and other healthcare training programmes, this model combines practical realism with cost efficiency, allowing institutions to deliver in-depth, confidence-building obstetric training without the high expense of comparable models.

By enhancing both student competence and curriculum delivery, the Obstetric Phantom Set provides exceptional educational value for developing vital maternity care skills.

Skills

- Our most popular set for delivery practice
- The fetal dolls can be placed in the model in various positions, to enable the student to practise palpation through the abdominal wall
- Different birth positions can be demonstrated

Features

- Based on a female pelvis, this life size model features all the relevant landmarks
- The vulva will stretch during the delivery procedure and afterwards will return to its original form
- Removable abdominal wall
- Available in light and dark skin tones

Includes

- Fetal Doll with Four Interchangeable Heads
- Obstetric Phantom, with Fetal Doll
- Plastic Female Pelvis
- Instruction Manual
