## WHAT IS THE AIRSIM BABY X?

AirSim Baby X is an infant airway trainer based on a 5-month-old anatomy, ideal for practicing oral and nasal intubation, bag-valve-mask ventilation, and LMA or supraglottic device insertion. Featuring a 3-year warranty, it supports over 80,000 intubation cycles. With visual feedback for lung and stomach inflation, modular components, and a durable carry case, it's designed for effective, portable, and reliable clinical training

### WHY PURCHASE THIS MODEL?

#### **Realistic Anatomy:**

Based on a 5-month old 50<sup>th</sup> percentile infant patient.

#### **Versatile Training:**

Teach oral & nasal intubation, supraglottic device insertion and more.

#### **Real-Time Feedback:**

User feedback through the visualization of stomach inflation and lung expansion

#### **Durability and Cost-Effective:**

The AirSim Baby X is certified to practice 80,000+ intubation cycles without fail and is supported by a 3 year warranty

#### **Modular Design:**

Modular design allowing for all parts to be changed within your organization (if required).

### PROCEDURE TRAINING:

- Oral and Nasal intubation
- Bag/Mask Ventilation
- Laryngeal Mask Airway (LMA) and Supraglottic Device Insertion

### IDEAL FOR TRAINING:

- Pediatric anesthesiologists
- Emergency medicine doctors
- Airway course instructors

### TRAINING YOU CAN TRUST- 3 YEAR PROMISE!

We are so confident in the quality and durability of our products that we provide a 3 year warranty on the AirSim Baby X.
