WHAT IS THE AIRSIM?

The AirSim is an anatomically accurate airway management trainer designed for early-stage skills development. Engineered to replicate key anatomical landmarks of the human airway - including a true-to-life nasal cavity - it provides a highly realistic platform for practicing essential techniques such as naso-tracheal intubation, BVM ventilation, and supraglottic device insertion.

WHY PURCHASE THIS MODEL?

Realistic Anatomy:

Anatomically correct nasal cavity, which allows for important landmarks in nasotracheal intubation and nasally directed fibre optic examination.

Versatile Training:

Novel neck construction allowing the manikin to be secured into various positions. Inflatable tongue bulb to create tongue edema providing a variance during training.

Real-Time Feedback:

Visual indicators of stomach inflation and lung expansion for immediate training feedback.

Durability and Cost-Effective:

The AirSim is certified to practice 80,000+ intubation cycles without fail and is supported by a 3 year warranty.

Modular Design:

Delivered ready to use in a durable carry case for easy transportation and safe storage.

PROCEDURE TRAINING:

- Single naso-tracheal intubation
- Bag-valve mask (BVM) ventilation techniques
- Full range of supraglottic device insertion
- Direct laryngoscopy
- Awake fibre optic examination
- Endotracheal tube insertion
- Combi tube insertion
- Single lung isolation techniques

IDEAL FOR TRAINING:

- Paramedics
- Anesthesiologists
- Emergency medical technicians
- Respiratory therapists

TRAINING YOU CAN TRUST 3 YEAR PROMISE!

We are so confident in the quality and durability of our products that we provide a 3 year warranty on the AirSim.

Product Code: AA11100
Dimensions: 47 x 27 x 34cm
Weight: 3kg
