## WHAT IS THE TRUINFANT IV ARM?

The TruInfant IV Arm is a realistic peripheral IV cannulation trainer, anatomically based on a 5-month-old infant. It features lifelike resistance and flashback, multiple venous access points, and supports 300+ needle insertions per arm. With quick setup, easy maintenance, and interchangeable arms, it ensures long-term value. This model is ideal for consistent, high-quality IV training in pediatric clinical education. This model comes fully assembled and a consumable bundle that includes two replacement arms.

### WHY PURCHASE THIS MODEL?

#### **Real-time Feedback:**

Provides lifelike resistance during cannulation and blood flashback.

#### **Realistic Anatomy:**

Contains the dorsal venous arch, cephalic and basilic veins allowing needle cannulation at various locations.

#### **Durability:**

This bundle withstands 900+ needle penetrations

#### **Cost-Effective & Modular Design:**

Quick and easy replacement, simply unscrew the arm from the base and replace. 2 replacement arms are supplied upon initial purchase to extend the trainer's life and maintain training quality. Further replacements can be purchased in packs of 3.

#### **Minimal Set-Up Required:**

Ready for use in under 5 minutes.
