

# CPR LUNG REPLACEMENT

## Replacement Lung Instructions for Simulaids CPR Manikins

To attach disposable Replacement Lung, do the following:

- Steps:**
1. Insert airway connector flanges into circular lung opening as shown
  2. Pushing the flange into the hole while twisting the connector will help
  3. The connectors can be used multiple times by removing them from the lung you are disposing. Thoroughly disinfect the airway connector before using it as a replacement.
